**Re: Request of the Scott County Soil and Water Conservation District for extension of time limit on expenditure of funds from Fiscal Year '05.**

The Scott County Board of Supervisors annually reviews the unobligated and undisbursed funds for the preceding three fiscal years of the annual \$25,000 funding allotment for the Scott County Soil and Water Conservation District. The County's adopted policy states:

1. Funds not obligated after six months from the end of the previous fiscal year are recalled.
2. Funds obligated but for which construction on the projects has not started by the end of the following fiscal year are recalled.
3. Funds obligated for which construction is not completed after three years from the end of the fiscal year are recalled.

I have attached the letter received from the Soil and Water Conservation District on the obligated funds from fiscal year '05 that which have not been disbursed and are subject to recall. The Conservation District is requesting another extension until 8/30/09 to allow a project those funds have been obligated for to be completed. That project has been held up due to design delays at the State office of the NRCS and beyond the control of the applicants and the local District

It is recommended the Board approve a resolution granting that extension as requested.

Attn: Board of Supervisors

Scott County Soil & Water Conservation District would like to request an extension for use of 2004-2005 funds. On February 21, 2008, the Board of Supervisors approved a 6 month extension for the disbursement of Scott County's annual funding allotment from FY 2005 to the District for use as matching funds for soil conservation projects.

At this time, the District is requesting an additional extension of funds until 8/30/09. The dollar amount obligated for this project is \$13,202. This project has been delayed originally due to the design and approval of the project by the State Engineering Staff. Most recently the project was to be started this spring and finished by 12/30/08. Due to weather delays, the waterway part of the project should be completed this fall with the grade stabilization structure completed by 8/30/08.

The District request is for an extension of the \$13,202 from FY04-05 until 8/30/08.

Please call me at 563-391-1403 x3 if you have any questions or require further information. Thank you.

Sincerely,

Jan McClurg  
State Secretary
