rethink recycling

Scott County Board of Supervisors

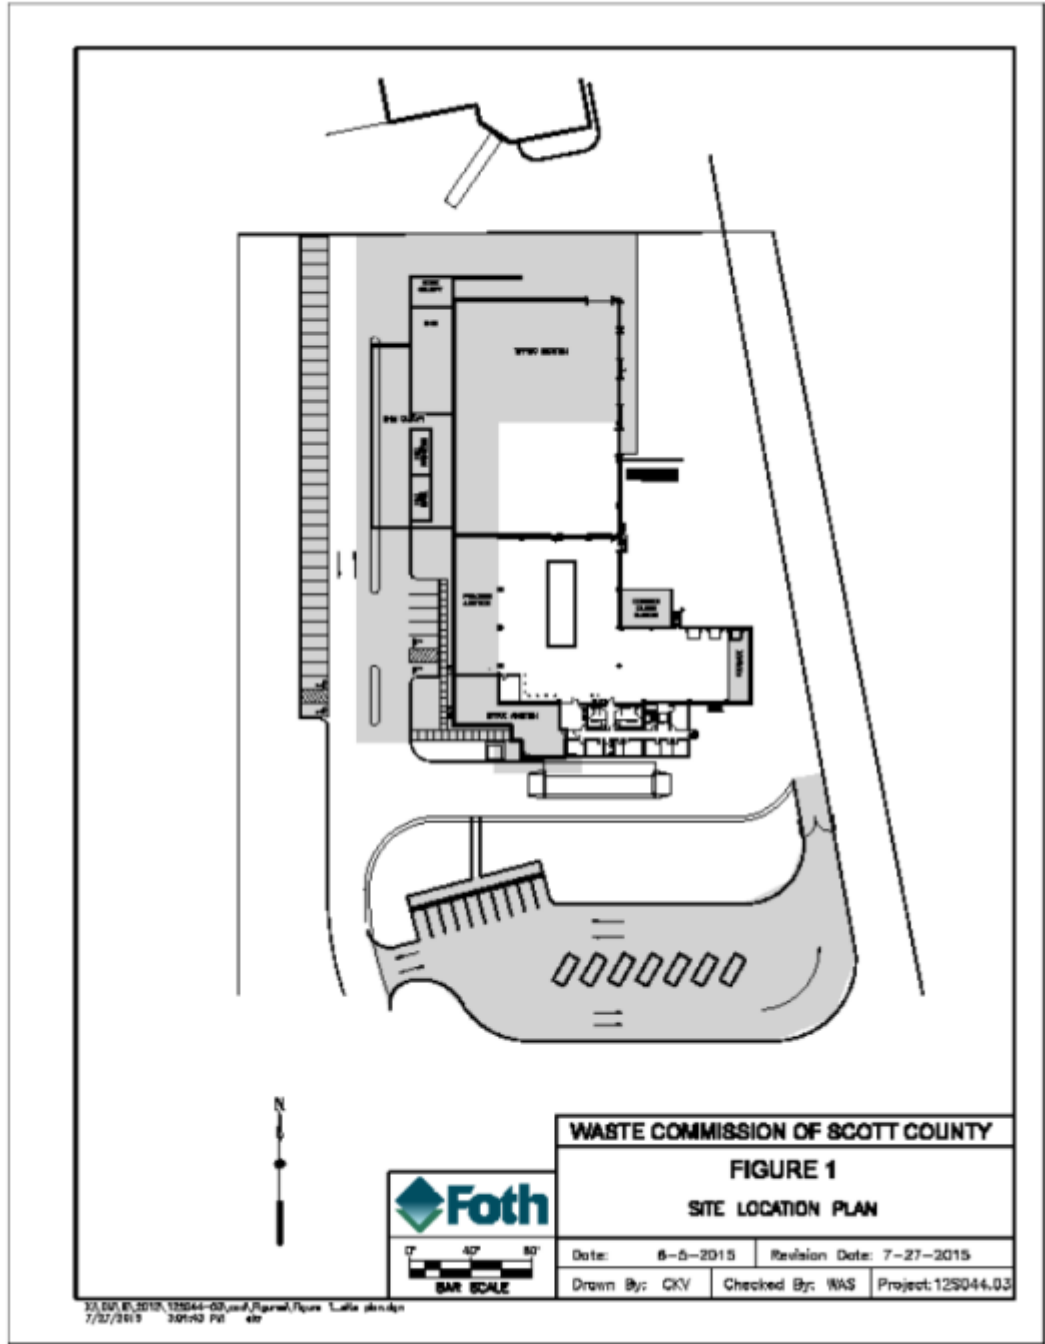

April 19th, 2016

Kathy Morris, Director

Waste Commission of Scott County

Construction Update

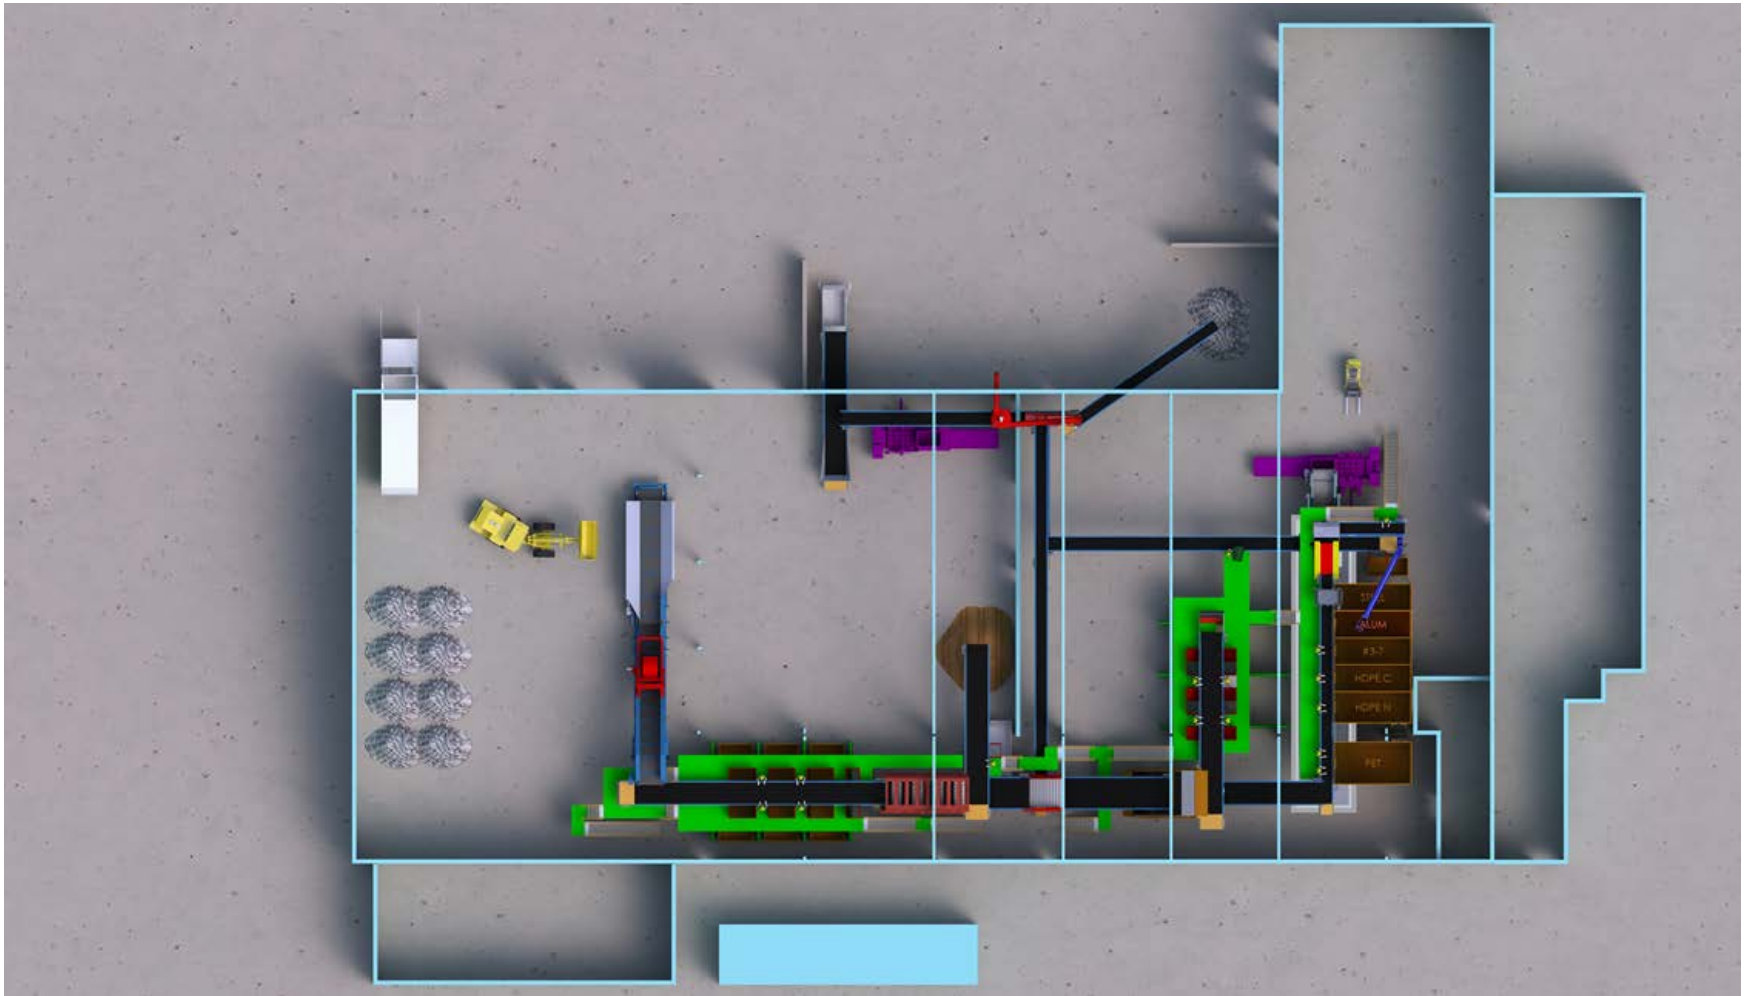

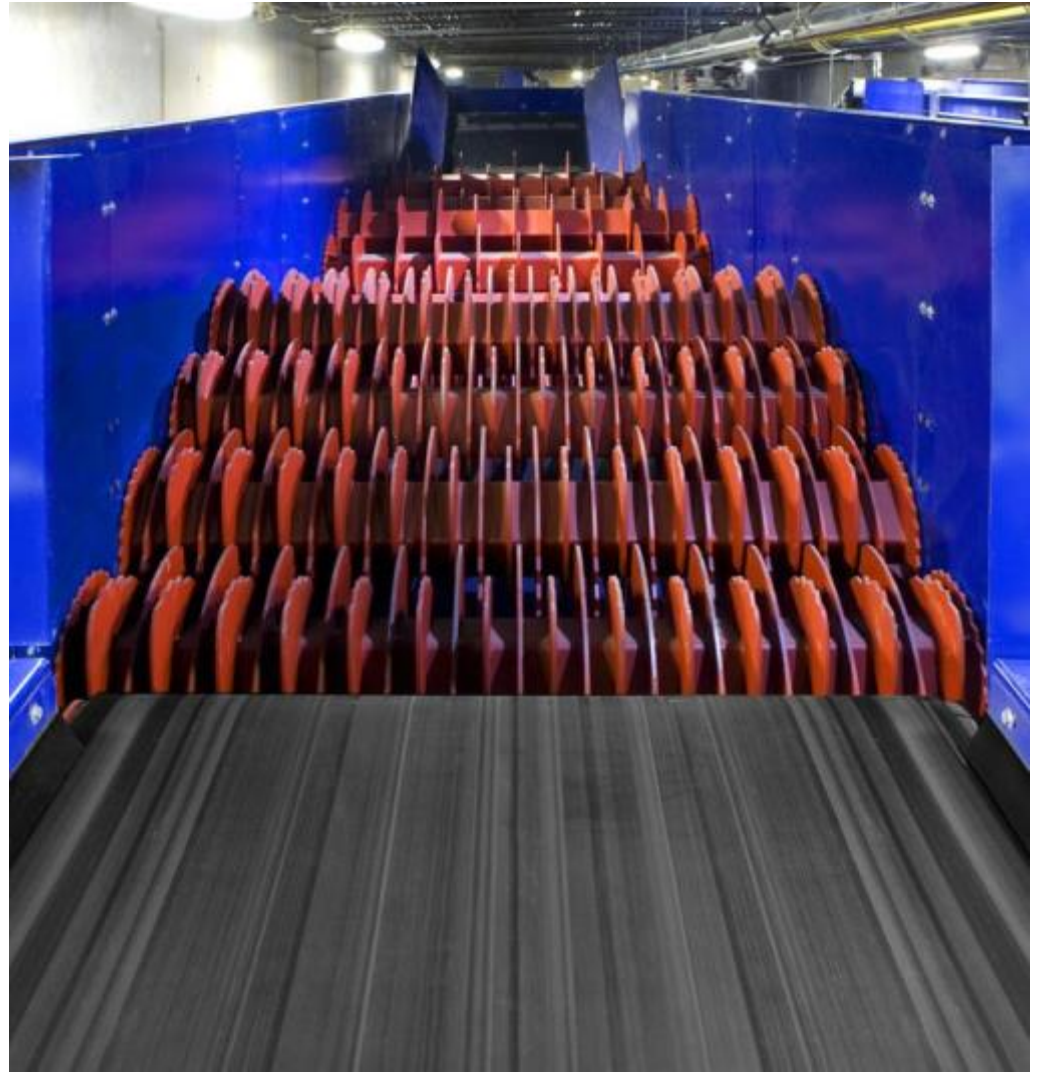

Sorting Equipment

- **OCC Screen**
- Automatically separates cardboard from other fibers, containers and debris. Consisting of durable thick steel discs, the elliptical offset pattern provides lateral agitation to remove contaminants, leaving the OCC end-product highly marketable.

- **Glass Breaker Screen**

- Durable cast chromium elliptical discs provide maximum glass breakage while decreasing jams and downtime. Heavy-duty and low-maintenance, this multi-level screen is field-proven to break glass and separate broken glass and fines from fiber and containers at optimum efficiency without losing any aluminum.

- **Disc Screens**

- The CPScreen automatically separates small fibers from containers, and 2D from 3D material, easily and efficiently. Small screen openings decrease loss of fiber to container line, recovering even the smallest pieces of fiber. CP's long-lasting rubber cam-style discs are specially engineered to have consistent spacing at all points at all times to make discs highly resistant to both jamming and wrapping. CP's screens ensure that material is sized properly for the most efficient sort possible.

Interim Processing

April Campaign Launch

- Presentations
- Program press release
- Advertising begins April 22
- GoAllInQC.org launch April 22
- Facebook, Twitter, Instagram & YouTube launch

Go All In Education

- **June:** Postcard 1 to residents
- **June-July:** Carts with IML, brochure, magnet & bookmark – Delivery starts June 22nd
- **August 1st:** Single stream collection begins
- **September:** Postcard 2 to resident
- **Ongoing:** Traditional media
- **Ongoing:** Social media
