Future Land Use Map Legend Notes:

This map is a policy document intended to be used in conjunction with the Land Use Policies of Scott County to evaluate rezoning and special use permit applications. It is meant to act as a guide to show graphically where and what type of development may occur in the unincorporated areas of Scott County. In the case of residential development it has also attempted to show a likely time frame for that development. Adoption of this map does NOT rezone property. Areas without any color designations are judged not likely to undergo any change in zoning for the next thirty or more years. Current zoning information on all property in the unincorporated area of Scott County is available at the Scott County Planning and Development office located at 518 West 4th Street, Davenport, Iowa or call (319) 326-8643.

Date of adoption: April 2, 1998

Geographic Source:
GDT Dynamap 1000 (based on
U.S. Census TIGER files).

Projection:
U.S. State Plane 1927, Illinois W

Map prepared by

July, 1998
